

ART LESSON E: MAKE A MINI ART GALLERY

You might want to make this lesson together if you have brothers or sisters

Learning Outcome: I am given opportunities to experiment with different resources to make a 3D model

You will need:

Take a look at these mini art galleries...

- Use a small box or shoebox to make your gallery. Cut off the sides you don't want then you can paint the walls or line them with paper.
- I printed off images of some famous paintings but you might want to draw your own pictures for your gallery. Make frames from the left-over card as shown below.
- You could make a sculpture to stand on the floor. I made a bench for visitors to sit on.
- Now you need the visitors – have you got any toys you could use?

Send a photo of your work to school please
